

Ultra clear and ultra thin glass with superior clarity and strength for electronics, solar, and architecture. Contact KS Glass for glass solution.

Ultra-thin solar glass, with its superior light transmittance, flexibility, and reduced weight, is increasingly preferred in both rooftop and building-integrated photovoltaic (BIPV) applications.

Customized ITO / FTO conductive glass plays a crucial role in scientific experiments, offering excellent conductivity, transparency, and stability. Ideal for photovoltaics, sensors, and analytical instruments.

The thin profile of ultra-thin PV glass allows for more efficient use of space, making it ideal for applications where space is limited or where a low-profile design is desired.

AGC GLASS EUROPE, A LEADER IN FLAT GLASS solar power applications. It is the European branch of AGC, the world's leading producer of flat glass. It has over 100 sites throughout Europe, from Spain ...

With its very high solar energy transmittance, our low iron glass Pilkington Optiwhite(TM) is the ideal cover plate for a range of solar technologies, including Thin Film Photovoltaics, Concentrated Solar Power ...

is a high strain point glass substrate developed for use in solar cells and modules. It has a high strain point of 550°C and can endure heat treatment processes at high temperatures.

Light and Easy: It's much lighter, making it easier to carry and install. Flexible Design: It can be bent and shaped, fitting into different places. Looks Good: Because it's thin and see-through, it can be used in ...

JNS offers ultra thin glass in clear, ultra clear, alumino-silicate, borosilicate, non glare, anti-reflective and other forms. Today Ultra Thin Glass now comes in many forms and is stronger, lighter and more ...

787 Product Information SCHOTT®; Solar Glass 0787 is a technical glass designed for use as a highly transparent and ultra-thin protective cover for Space PV cells and Optical.
