

What is a street lighting cabinet?

Street lighting cabinets allow to control the time of switching on and off the lighting of streets, parks, squares or objects. Depending on the needs, we make systems based on simple astronomical clocks as well as modern solutions using GPS, GPRS, GSM technologies.

Why should a data center use LED lighting & controls?

Our lighting and controls are the ideal choice for data centers that prioritize energy efficiency. Our LED fixtures use significantly less power than traditional options. And our advanced controls -- such as motion sensors and automated dimming devices -- further reduce energy consumption as well as cut operational costs.

Does your data center need emergency lighting?

Providing emergency lighting during power loss is a life safety requirement. We offer various solutions for data centers, including centrally located emergency inverter power systems, unit emergency lights, exit signs, and emergency battery packs for luminaires, ensuring your facility stays safely illuminated during outages.

Are Halo recessed lights a good choice for a data center?

HALO Commercial's recessed lights delight specifying engineers with the right balance of visual comfort and energy efficiency that meets commercial code. These intelligent digital and LED-based lighting systems reduce energy and operating costs -- making your data center a smarter building.
