

From projects of less than 20 to more than 600 MW DC, PCL Solar can do it all. Our team of experts proudly delivers projects across Canada, the United States and Australia.

The projects are currently under construction and have provided hundreds of local jobs. Both projects will enable fossil fuel companies to reduce greenhouse gas emissions and are ...

Construction is slated to begin in the second quarter of 2026, with the goal of reaching volume production in 2028, pending regulatory and environmental approvals.

Worley Canada Construction, in partnership with George Gordon Developments Limited (GGDL) and Wicehtowak Solar Inc., is delivering Canada's largest Indigenous-owned solar project.

Could we try to make them here? Between 2019 and 2024, solar energy capacity nearly doubled in Canada, but most solar companies have to import their panels from Asia.

The aim of this publication is to provide solar consultants, home owners, home builders and their design and construction teams with a framework for making decisions together on the types of photovoltaic ...

According to the Canada Energy Regulator (previously the National Energy Board), By 2040, solar power will account for approximately 3% of total energy generation capacity in Canada. It's a huge ...

FLEXRACK and Alltrade have started construction on a 182 MW solar project portfolio that will help two fossil fuel companies in Canada reduce greenhouse gas emissions.

Under Dr. Qu's leadership, we have grown into one of the world's largest solar photovoltaic products and energy solutions providers, as well as one of the largest solar power plant developers globally.

Search all the ongoing (work-in-progress) solar photovoltaic (PV) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Canada with our comprehensive online database.
