

Introduces a new vehicular architecture called CARACAS (vehicular Architecture for detailed CAN Attacks Simulation) for simulating detailed CAN (Controller Area Network) attacks on battery electric ...

Battery Electric Vehicles (BEVs) have become a cornerstone in the transition towards sustainable transportation. These vehicles operate solely on electric power stored in batteries, marking a ...

Explore Caracas with our travel guide, featuring Avila National Park hikes, lively Plaza Bolivar, renowned museums and local dining tips.

Investigate the technological advancements of Battery Electric Vehicles (BEVs) and Fuel Cell Electric Vehicles (FCEVs), with a focus on their historical progress and current innovations.

Caracas, the capital of Venezuela, is a vibrant and bustling city situated in a valley surrounded by the towering &#193;vila mountains. With a population of over 2 million people, Caracas is ...

What is the role of electric vehicles in clean energy transitions? Electric vehicles are the key technology to decarbonise road transport, a sector that accounts for around one-sixth of global emissions. ...

CARACAS showcases the efficacy of this methodology, including a Battery Electric Vehicle (BEV) model, and focuses on attacks targeting torque control in two distinct scenarios.

A Battery Electric Vehicle (BEV) is a type of electric vehicle powered entirely by electricity, stored in a rechargeable battery pack. Unlike hybrid or plug-in hybrid vehicles, BEVs ...

Santiago de Leon de Caracas, Venezuela's capital, sits in Cerro Avila Valley, where mountain ranges soar 8000 feet from the Caribbean. Once inhabited by Toromaimo Indians, the city was founded by ...

Caracas is located along the Guaire River in the northern part of Venezuela, within the Caracas Valley of the Venezuelan coastal mountain range. The valley is close to the Caribbean Sea, separated from ...

Caracas is the capital and largest city of Venezuela, in northern Venezuela, near the Caribbean.

This study aims to evaluate the role of battery electric vehicles in reducing CO2 emissions in Latin America by conducting a systematic review of regional literature and analyzing CO2 emissions from ...

Outlook and scenarios for 2030 In the short term, if the structural imbalances persist, the fleet of electric vehicles could remain very limited, at less than a few hundred units, concentrated in ...

Located in the northern part of the country, the city sits in a valley at an elevation of approximately 900 meters (3,000 feet) above sea level, separated from the Caribbean coast by the &#193;vila Mountain ...

Caracas, city, capital of Venezuela, and one of the principal cities of South America. It is Venezuela's largest urban agglomeration and the country's primary center of industry, commerce, ...

Caracas (pronounced [ka'arakas]) is the capital and largest city of Venezuela, and one of the principal cities of South America. It is the country's leading center of education, culture, industry, and commerce.
