

Chile has reached fresh milestones in its energy transition amid a rapid build-out of solar and battery storage infrastructure. The context: The South American nation's brisk shift to clean ...

Atlas Renewable Energy has signed a power purchase agreement (PPA) with Chilean state-owned mining company Codelco to deliver 375GWh a year from a solar-plus-storage project in ...

Government officials have said they expect solar power will account for 46% of the country's total installed generation capacity by 2060, with most of that solar located in the north of...

The first two phases of Oasis de Atacama, the largest solar power and energy storage project in Latin America, have come on stream in Chile's Antofagasta Region.

In this report, we model a long-term outlook for the energy system, as well as an accelerated de-carbonization scenario, to explore how Chile's power system may adapt to increasing volumes of ...

This second stage of the country's electricity development requires strengthening the networks and enhancing system flexibility to achieve 100% renewable generation and carbon neutrality by 2050 ...

In November 2024, Chile's solar power generation capacity was projected to quadruple until 2060, in order to help decarbonize Chile's electricity generation. Energy storage will play a key role in taking ...

Partnering with Chilean solar developer Traveses Solar, Canadian Solar will supply an impressive 912 MWh energy storage system to be seamlessly integrated with the 600 MWp Santa ...

Chile is developing two types of solar technology: solar photovoltaic (PV) panels and solar thermal energy. There are 44 solar PV projects under evaluation, 86 in the approval process, 318 ...

Discover how METLEN Energy & Metals is driving Chile's renewable future with large-scale solar power and energy storage projects.
