

Power Storage Solutions offers DC power cabinets and rack systems from trusted manufacturers, delivering reliable enclosures for batteries and critical power.

Complete with rectifiers, batteries, battery fuse box, distribution boards and monitoring mounted in a cabinet. The batteries can also be placed in their own rack next to the cabinet.

The EPIC Series Battery Cabinet is designed to maximize DC system performance and battery life, saving you time and money. This NEMA 3R modular enclosure, with built in intelligence, will safely ...

This specification defines the requirements for a 75KW stand-alone battery cabinet, with 48VDC nominal voltage, self powered from the AC line, used in a DC system for offline backup functions during AC ...

Application NetSure battery cabinets for small DC power systems are ideal for customer premise installations where batteries are required.

Additional battery cabinets could be added to increase battery back-up time. This system is based on the APR24-3G modular switch mode rectifiers and the SC200 microprocessor based controller to ...

The DC Power cabinet features a front access DC load center capable of holding up to twelve 2-pole breakers. Multiple system configurations are available for 24, 48, 125, and 250-volt DC systems. The ...

All cabinets are made using 15kW or 30kW master DC supply or Load and parallel connected 15kW or 30kW slave units. The masters controls the entire system for ease of operation. All individual units ...

The DC cabinet is mainly to aggregate and share the current distribution of each battery rack to achieve the charge and discharge management function of each battery rack. The DC cabinet consists of DC ...

SBS designs and builds custom DC enclosures for battery systems and/or chargers. A typical cabinet integrates batteries, racking and chargers into an indoor (NEMA 1 or 12) or outdoor (NEMA 3R) rated ...
