

With the capacity to generate 2.5 MW of solar power, the project will significantly improve access to electricity on the islands, reducing the need for diesel generators and contributing to ...

East African Power is a long-term, SR-driven business developing, building, and operating utility-scale, small and medium hydro and solar power plants in Sub-Saharan Africa.

The East African Community (EAC) Partner States are collectively investing in renewable infrastructure, from solar mini-grids in Burundi to wind and solar projects in Kenya, signaling a region ...

Discover the top solar projects revolutionizing East Africa, from Kenya's 40MW Isinya and Makueni farms to Uganda's 100MW battery storage plant.

Located in Kenya's Rift Valley, this large-scale solar farm harnesses the abundant sunlight of East Africa to generate clean, renewable electricity. The project utilizes advanced photovoltaic technology and ...

In Tanzania, clean energy initiatives, including large-scale solar projects, are poised to benefit millions, with at least a quarter of underserved regions, according to the National Renewable ...

By offering state-of-the-art solar and BESS installations, Sawa Energy will enable companies to achieve greater energy independence and operational efficiency. This shift not only ...

Through our global Access to Energy programme, we collaborate with our valued partners to deliver reliable, clean power to health centres, schools, agricultural operations, and small ...

By aligning innovation with local needs and combining global expertise with grassroots partnerships, solar power can become a catalyst for inclusive, resilient and future-ready development ...

Africa experience a surge in renewable adoption, especially with solar energy, in 2025. In this article, we highlight some of the top solar energy projects completed across the continent within ...
