

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help fix its energy ...

In a major push for its clean energy transition, the Egyptian government has successfully secured financing for a landmark one-gigawatt (GW) solar power plant project.

In 2024, Egypt embarked on a major renewable energy initiative by announcing the construction of two solar power stations with a total investment of 1 billion Egyptian pounds (\$20.60 million), funded by a ...

Egypt is intensifying its transition toward renewable energy, with solar power playing a pivotal role in the country's ambitious strategy to meet 42% of its electricity needs from green ...

Rising from this vast landscape is the Benban Solar Park, one of Egypt's most consequential national projects and one of the largest grid-connected solar power complexes in the ...

In recent years, frequent fuel crises and soaring natural gas import costs have forced Egypt to re-evaluate its energy structure and accelerate its investment in photovoltaic power ...

Egypt has revised its targets upward, now aiming to generate 42 percent of electricity from renewable sources by 2030 and over 60 percent by 2040, leveraging wind, hydropower, ...

Egypt had just more than 59 GW of installed power generation capacity as of year-end 2024, with just 11% of that figure coming from renewable energy. The rest is from fossil fuels, mostly...

By leveraging its abundant solar and wind resources, Egypt aims to utilize green hydrogen to significantly reduce carbon emissions in transportation, industry, and power generation, ...

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help fix its energy crisis. Obelisk, located in Nagaa ...
