

From the Spanish Steps to Testaccio's new eco-district, Rome's energy storage revolution proves sustainability and history can coexist. Whether you're upgrading a centuries-old villa or a modern ...

Italy's largest second-life battery energy storage system was officially launched at Rome-Fiumicino airport yesterday. State-owned gas and electric company Enel's 2.5 MW/10 MWh Pioneer...

As global energy demands soar, the Rome Star Energy Storage Project emerges as a game-changer in renewable energy integration. This article explores how this 200MW/800MWh facility redefines grid ...

Italy's largest energy storage system based on used batteries for electric vehicles was inaugurated on Tuesday at Rome's Fiumicino airport to help it reduce carbon emissions.

Using Rome Airport as an example, the planned 2nd-life battery storage in combination with a PV system shows the way towards the goal of net-zero emissions in the local power supply. In addition, ...

As battery reuse becomes an increasingly vital pillar of energy policy, this pioneering system could serve as a model for airports and industrial zones across Europe aiming to pair ...

Europe's largest airport solar-battery integration, boosting energy resilience and circular economy leadership. Rome's Fiumicino International Airport has launched Pioneer, Europe's largest ...

Inaugurated on June 3, 2025, at Rome Fiumicino Airport, PIONEER is an energy storage system based on repurposed EV batteries.

The Pioneer project (airPort sustaInability secONd lifE battEry stoRage), carried out by Enel and ADR (Aeroporti di Roma) with the scientific contribution of the German research institute.

Mercedes-Benz Energy is contributing to improving the energy efficiency of Fiumicino Airport in Rome with its battery storage solutions. Repurposed vehicle batteries are used as stationary energy ...
