

Australia-based power producer Pacific Hydro has secured environmental approval for a 190.7-MWp solar project with a 200-MW battery energy storage system (BESS) in Chile, the ...

Currently, 36 of the 129 large-scale projects Latin America projects with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works ...

In March 2024, BESS Coya, the largest battery-based energy storage system in Latin America, started operations. The facility is located in the Antofagasta region and has a storage ...

EverCore integrates a single factory-assembled, ready-to-install solution combining a hybrid inverter, a battery system and an advanced energy management system (EMS).

Copenhagen Infrastructure Partners (CIP) has reached final investment decision on a 220MW/1,100MWh battery energy storage system (BESS) project in Antofagasta, Chile.

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage.

Trina Storage has shipped the first 1.2GWh batch of its self-developed Elementa 2 BESS to Chile, marking its largest overseas standalone energy storage project and ushering in a new era of ...

EDF power solutions Chile is at the forefront of developing both short- and long-duration storage projects, including pumped storage plants and other innovative technologies.

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.
