

# Forecast of growth rate of lithium battery for energy storage in China

Ahead and heading into a new era for new energy, it is expected that China's energy storage capacity and its BESS capacity in particular will grow at a CAGR rate of 44% between 2023 and 2027.

The China lithium energy storage battery electrolyte market is projected to grow at a robust CAGR of approximately 12-15% over the next five years, reflecting a dynamic expansion driven by ...

China has a goal to install 180 gigawatts of battery energy storage systems by the end of 2027, with a direct project investment of \$35.2 billion. Large-scale battery storage systems are charged during off ...

The China Battery Energy Storage Systems Market is projected to grow from USD 3.1 billion in 2025 to USD 9.8 billion by 2031, at a CAGR of 21.5% during the forecast period. The growth is driven by ...

Developments in lithium-ion and solid-state batteries are enhancing energy density and longevity, which may lead to broader applications across various sectors. These advancements could potentially reduce costs and ...

The China energy storage market size exceeded USD 223.3 billion in 2024 and is expected to register at a CAGR of 25.4% from 2025 to 2034, driven by the country's aggressive push for renewable energy and carbon ...

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.

Key trends include deployment of virtual power plants, EV charging-side storage, and growth in lithium-ion and flow battery technologies for long-duration storage.

This report, published by ResearchAndMarkets , delivers high-quality tables, figures, and textual analysis to reveal the evolving lithium landscape as global demand for lithium-ion batteries surges.

The China Battery Market was valued at USD 38.75 billion in 2025 and expected to grow from USD 44.16 billion in 2026 to reach USD 83.73 billion by 2031, at a CAGR of 13.65% during the forecast period ...
