

How much does GCL optoelectronics invest in GW-level perovskite industrial base project?

The total investment of the GW-level perovskite industrial base project of GCL Optoelectronics is 5 billion yuan, with a target production capacity of 2GW, and a 1GW perovskite commercial module production line has been initially arranged.

How big is solar PV in 2024?

Global solar PV installations set another record in 2024, reaching 597 GW - a 33% increase over 2023, and 148 GW more than the previous year (Fig. 1). Although the annual growth rate slowed compared to the exceptional 85% surge in 2023, it was still substantial enough to reinforce solar energy's leading dominance on global renewable energy expansion.

Who dominated the global solar market in 2024?

In 2024, China once again dominated the global solar market, installing an impressive 329 GW, over six times the capacity added by the second-ranked United States, and exceeding the combined total of all other top 10 markets.

Will the global solar PV market grow in 2025?

Despite these headwinds, the global solar PV market is still expected to grow by 10% in 2025, reaching 655 GW under the Medium Scenario (see Fig. 4). This would mark a continuation of the deceleration trend following the extraordinary 85% growth in 2023 and the more moderate 33% in 2024.

Global solar capacity additions are expected to average 540 GW through to 2035, according to the latest report by the IEA. The IEA World Energy Outlook 2025 report predicts that ...

Designed by EDRI, GCL Photovoltaics' GW-scale perovskite production base in Kunshan officially began operations in June 2025, establishing itself as the world's first GW-scale mass ...

On July 7, CHN Energy's first gigawatt-level offshore photovoltaic (PV) project, the Guohua Investment Shandong HG14 Offshore 1GW PV Project, received approval from the State ...

China's SDIC subsidiary commissioned a 1 GW photovoltaic plant on the Yalong River in Sichuan, making it the world's third-highest-altitude PV facility at 4,600 m. The project integrates with ...

The world's first gigawatt (GW)-scale perovskite photovoltaic (PV) module mass production line, built by Jidian Solar, has officially begun operations in Xishan Economic and ...

At present, green and low-carbon production has become a distinctive feature of TW Solar for high-quality development, and the Modules Jintang Base, the first GW-level PV modules factory in ...

A key issue is the uneven distribution of solar market growth. Most expansion has been concentrated in the Asia-Pacific region, led by China, creating widening disparities between regions. ...

The study found that more than 35 countries achieved GW-scale annual installations. Regions such as Africa and the United Arab Emirates (UAE) are ramping up solar capacity, ...

On June 24th today, the GW-level perovskite industrial base of GCL Optoelectronics was put into operation in Kunshan, which is also the world's first GW-level tandem module production ...

The United Arab Emirates recently announced the launch of the world's first GW level 24/7 solar energy storage project, which aims to transform renewable energy into a reliable base ...
