

The system arrived at the John Fernandes Wharf in Georgetown in 22 containers and will serve as the facility's emergency support in the event of turbine failure. It comprises battery racks, six ...

Designed to respond instantaneously, BESS provides "critical" backup power to protect the integrity of the electrical grid and maintain operational stability in the event of turbine failure.

-engineered to ensure uninterrupted energy delivery in the event of turbine failure, LNDCH4 Guyana says LNDCH4 Guyana has announced the arrival of the Backup Battery Storage ...

LNDCH4 Guyana on Friday announced the arrival of the Backup Battery Storage System (BESS), a critical part of the power plant's emergency support system, that is engineered to ensure ...

After a period of dedicated efforts, on January 27, 2025, the Wakenaam Diesel and BESS Storage Project was officially completed.

The arrival of the BESS marks significant progress of the Gas-to-Energy (GtE) progress and highlights LNDCH4's commitment to Guyana. Country manager Humberto Lopez stated, "This ...

With its recent oil discoveries and ambitious climate goals, Guyana has become a hotbed for energy storage container innovations. The country's growing demand for stable power grids, especially in ...

As a key component of Guyana's landmark Gas-to-Energy (GtE) initiative, the BESS will enhance the project's efficiency and reliability; helping to stabilize the national grid, reduce carbon ...

The BESS forms a critical part of the power plant's emergency support system and is engineered to ensure uninterrupted energy delivery in the event of turbine failure. The inclusion of ...

Guyana's landmark Gas-to-Energy project reached a critical milestone with the arrival of a 30-MW backup battery energy storage system (BESS) at Georgetown's John Fernandes Wharf, ...
