

How to fix photovoltaic panels on cement roof

Can I install solar panels on a concrete tile roof?

Some companies may tell you that you can't go solar or that they won't do the install, but that is not the case. If you have a concrete tile roof, there are two common ways to go about installing solar panels on a concrete tile roof. First, your installer can put S-hooks under the tile for your system to be mounted on.

How do you install solar panels on a roof?

Your installer would temporarily remove the tiles, install the hooks underneath into the roof, then put the tile back over the mount, and rack the system from there. The second option is called a comp-out, where your installer will remove the tiles where you intend to put solar, then lay down composite shingle to install the array.

How do you install a roof tile system?

First, your installer can put S-hooks under the tile for your system to be mounted on. Your installer would temporarily remove the tiles, install the hooks underneath into the roof, then put the tile back over the mount, and rack the system from there.
