The Challenges
The Opportunities
What to Expect from Cambodia's Renewable Energy - Policy
As of 2021, Cambodia saw over 51% of the country's domestic energy production come from renewable sources. The majority was sourced from hydropower (44.17%), while solar and biomass accounted for around 7%. Even though renewables now make up most of Cambodia's energy, bigger ambitions are ahead. An additional 495 megawatts (MW) of electricity genera...
