

If you've ever wondered how Ireland plans to keep the lights on while phasing out fossil fuels, look no further than its booming Irish battery storage companies.

We represent Ireland and Northern Ireland's energy storage industry bringing together exciting new technologies and innovations that will help decarbonise our energy system and support a strong, ...

This practical guide explores the latest storage technologies, installation considerations, and real-world performance data specific to Irish weather conditions, helping you make an informed ...

It is located at Poolbeg Energy Hub, where ESB - around 95% owned by the Irish state with the remaining stake held by its employees - is planning to deploy a combination of clean energy ...

Siemens Energy will deliver the first-ever hybrid grid stabilization and large-scale battery storage plant at Shannonbridge in Ireland. This is the first time, these two technologies have been ...

Our mission is to advance energy storage solutions across a wide range of applications, including the provision of system services, exploitation of arbitrage opportunities, and maximization of renewable ...

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with Cushaling Wind Farm. Battery storage technology can ...

The Gorman battery system, with an installed capacity of 50 MW, is our world's first commercial-scale battery system and the first in Ireland. This project is part of our commitment to promoting battery ...

Ireland is an excellent starting point for RWE Renewables as we look to expand and grow our battery storage technology business and become a key partner in Ireland's low carbon energy transition.

Discover how commercial battery storage solutions maximise renewable energy investments for Irish businesses with 78% cost reductions and 4-6 year payback periods.
