

El-Mor will design and build battery energy storage systems (BESS) and related infrastructures for multiple projects with a total capacity of 1.5GWh and total power of 300MW.

Israel is entering a decisive phase in its clean energy transition, with Battery Energy Storage Systems (BESS) becoming a strategic priority for grid stability, renewable integration, and...

HiTHIUM and El-Mor Renewable Energy form a strategic partnership to develop 1.5GWh of long-duration battery storage projects, enhancing grid stability and solar integration in Israel.

The Israeli Electricity Authority (IEA) has awarded contracts for 1.5 GW of high-voltage battery storage across 11 projects in a recent tender. The awarded facilities will be developed in ...

Israel has signed a concession agreement to build a new solar power facility with integrated battery storage at the Ashalim energy complex in the Negev, a project expected to add ...

JinkoSolar today announced it has delivered a 10MWh of DC-side battery storage system to Israel. With this pre-installed high energy density ESS, which is scalable, controllable, and flexible, a high ...

Israeli renewable energy developer Enlight has won grid connection rights for 300 MW of battery storage capacity in a national tender, enabling the construction of systems that can store ...

Israel is advancing its clean energy ambitions with the approved expansion of the Halutziot solar project. Spearheaded by Enlight Renewable Energy, this development will boost the ...

HiTHIUM and El-Mor sign a strategic agreement for 1.5GWh of BESS projects in Israel, featuring the region's largest PV+BESS installation to support grid stability.

"Through this strategic partnership with El-Mor, we are delivering the long-duration energy storage technology needed to help stabilize Israel's grid, boost solar integration, and build a ...
