

Fully integrated, outdoor NEMA 3R and NEMA 4X nanogrid and microgrid cabinet systems. Configurable with internal power conversion and power distribution and energy storage or energy ...

The cabinet includes a smart thermal management system with a temperature-controlled fan and RS485 communication for data upload, ensuring efficient operation in varying climates.

Our team brings over 36 years of manufacturing experience to every outdoor cabinet project. Whether you're planning a single installation or a large-scale network deployment, we deliver BABA-compliant ...

Designed to house a variety of communications equipment, CUBE customers take advantage of our engineering and factory integration for complete turn-key solutions. The CUBE product line ...

Discover AZE Telecom's weatherproof outdoor electrical enclosures and durable outdoor cabinets. Protect your electrical and telecom equipment from harsh environments with our IP-rated, ...

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other ...

It supports remote upgrades, arbitrary parallel combinations, and has IP54 ruggedness. Perfect for large solar farms, industrial microgrids, or critical infrastructure, it maximizes the use of renewable energy, ...

Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.

Explore our modular outdoor communication cabinet for efficient, safe, and reliable hybrid energy solutions. Discover more!

The cabinet is designed for wide-temperature range operations (-20°C to +60°C), with built-in thermal management, anti-corrosion materials, and high-altitude suitability.
