

What does NDRC stand for?

The National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) recently issued a joint notice on deepening the pricing reform for electricity generated from renewable energy.

How will new energy development affect the NDRC?

Stay proactive with real-time data and expert analysis. The NDRC said in a statement: "The cost of new energy development has dropped significantly compared to earlier stages." However, it indicated that projects completed after June 2025 will transition to a "market-based bidding" system for electricity payments.

What is NDRC 136?

On February 9, China's National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) jointly issued a document No. 136. This document is a directive aimed at deepening the market-oriented reform of electricity pricing for renewable energy.

Should new energy on-grid electricity pricing be deepened?

From a long-term perspective, deepening the marketization of new energy on-grid electricity pricing will not only inject market vitality into the high-quality development of the new energy sector but also provide institutional guarantees for the construction of a new power system.

BEIJING, Feb. 10 -- China is accelerating the market-oriented reform of its renewable power pricing system in a bid to build a new power system and promote the sustainable development of renewable ...
