

Mumbai-based solar panel glass manufacturer Borosil Renewables Ltd (NSE:BORORENEW) plans to invest INR 5 billion (USD 68.2m/EUR 58m) to double its production ...

With PV module capacity ramping up, glass suppliers have been investing in new solar glass production capacity. As in India and China, new facilities are popping up in North America,...

Stewart Glass plans to ramp up operations in 2026 with a goal of manufacturing 150 tons of ultra-clear, fully tempered solar glass daily.

The project will cover an area of 500,000 square meters, with total investments amounting to \$300 million, and is set to build two production lines--one for flat glass with a daily ...

Mumbai-based Borosil Renewables has announced a 50% expansion of its manufacturing capacity of solar glass from 1,000 to 1,500 tons a day.

This would require about 89 million tonnes (Mt) of glass yearly, yet the actual production output of solar glass is only 24 Mt, highlighting a significant supply shortfall (3.7 times). Moreover, there is scarce ...

This article explores the latest trends in production capacity expansion, key applications across sectors, and how innovations like transparent solar technology are reshaping markets.

With PV module capacity ramping up, glass suppliers have been investing in new solar glass production capacity. As in India and China, new facilities are popping up in North America, with ...

The Group targets to add 6 new production lines with a total daily melting capacity of 6,400 tonnes in 2024, thereby increasing its total solar glass daily melting capacity from 25,800 ...

Facilities that would normally produce 12,000 tons per day are now inactive. Solar glass businesses and their industry associations recently held a series of meetings to discuss production ...
