

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. ...

Nordic Batteries manufactures its eENERGY high-energy battery modules and ePOWER high-power battery modules in Norway using battery cells from Norwegian manufacturers and its own ...

Summary: Discover Norway's leading lithium battery innovators driving sustainable energy storage. Explore market trends, competitive rankings, and how companies like EK SOLAR are shaping ...

Norway-based shipowner and operator AquaShip/Intership has contracted Norwegian Electric Systems AS (NES) to deliver a deck-based battery energy storage system to the Grip ...

Norway's blade battery technology is redefining energy storage across industries. Unlike traditional lithium-ion batteries, blade batteries use stacked cell architecture to maximize safety and efficiency.

Since 2015, the NMA has observed an increase in the use of large battery systems on Norwegian ships. At the start of 2025, battery systems with lithium-ion cells (hereinafter referred to as battery systems) ...

NES, specializing in sustainable energy design and smart control systems for vessels, will deliver a containerized energy storage system that includes a "Quest" battery charger, a 1 MW ...

(WO) - Norwegian shipowner Rem Offshore has contracted Norwegian Electric Systems AS (NES) to deliver a deck-based battery energy storage system to its Rem Inspector construction ...

Picture lithium batteries as the Swiss Army knives of energy storage - compact, versatile, and surprisingly powerful. In Oslo's context, they're the backbone of systems storing excess wind ...

Norway-based shipowner and operator AquaShip/Intership ...
