

The industry continued breaking records and experiencing unprecedented growth, accounting for 66% of all new generating capacity added in 2024. All solar segments set annual ...

This article explores recent advancements in solar panel technology, policies encouraging adoption, leading states, and prospects for solar energy in the US by 2025.

A record-breaking year for solar generation and a leap in battery capacity have shifted the U.S. energy landscape, turning solar into a primary workhorse for meeting the nation's surging power ...

IEA PVPS has released its latest Trends in Photovoltaic Applications 2025 report, revealing that the world's cumulative installed PV capacity surpassed 2 260 GW by the end of 2024, marking a 29% ...

pv magazine's global monthly edition offers authoritative reporting, market-driven analysis, and expert perspectives on the technologies, policies, and investments transforming global power...

Join us at Solar Power World as we cover the world of solar news on technology, development and installation on a daily basis.

Explore the latest solar panel technology, new solar panel technology, and solar energy technology trends improving efficiency.

Latest solar power news from Europe, Latin America, Sub-Saharan Africa, APAC, MENA and more. Stay updated on solar PV, solar energy, policy & projects.

In this article, we uncover the latest technologies and examine how these new solar innovations increase efficiency, improve overall performance and increase the lifespan of a solar panel.

SEIA reported that the United installed 50.0 GWdc of PV in 2024--up 21% y/y. At the end of 2024, solar was the second-largest source of U.S. generation capacity, though still a growing ...
