

Romania was a major player in the solar power industry, installing in the 1970s and 1980s around 800,000 m (8,600,000 sq ft) of low quality solar collectors that placed the country third worldwide in the total surface area of PV cells. One of the most important solar projects was the installation of a 30 kW solar panel on the roof of the Politehnica University of Bucharest that is capable of producing 60 MWh of electricity per year.

During the communist era from the 1970s to the 1980s, Romania's energy priorities centered on large-scale hydroelectric, coal, and nascent nuclear development, leaving solar applications to marginal ...

This article will delve into Romania's solar landscape, providing a comprehensive overview of the current state of the market, government policies, and incentives, as well as the potential for future growth.

This article provides a comprehensive overview of the current state of large-scale PV projects in Romania, covering project details, readiness levels, key players, and the overall impact on the ...

In response to the growing market demand, Sunhome introduces integrated smart residential energy systems to Romania, featuring the Oasis Home for villas, Woods Home for ...

Driven by EU funding, simplified permitting, and the launch of Romania's first Contracts for Difference (CfD) scheme, solar is becoming a central pillar of the national energy mix-- occasionally overtaking ...

Romania had nearly 290,000 prosumers by the end of November, with a combined installed capacity of 3.35 GW, according to the national energy regulator. While prosumer projects ...

The Ministry of Environment has announced the launch of a new edition of the Green Home Solar program, with a budget of EUR400 million. This edition will also fund electricity storage ...

Recent sector analyses reveal a substantial interest among Romanian homeowners in detached houses, with over 50% considering the acquisition of photovoltaic systems in 2023.

Incentives for prosumers include exemptions from taxes and green certificate purchases, alongside subsidy programs like Casa Verde Fotovoltaice. However, bureaucratic delays and fiscal ...
