

Designed to support very large solar modules, including 550W panels, the IR-45ASA can be assembled in just 2 minutes per frame, making it the most cost-effective ground mount racking system available.

Opsun experts takes care of all the mechanical aspects of your solar PV project and we deliver detailed, project-specific set of engineering plans to help accelerate installation time.

The 15-45° adjustable angle can be seasonally adjusted to offer optimal year-round energy production across most regions around the world, and with its easy to slide adjustable solar module height ...

Krinner Ground Screws offer a high-performance foundation for ground-mounted solar systems without the need for concrete. Engineered in Germany, these galvanized steel screws are ideal for sloped, ...

IntegraRack IR-45ASA adjustable solar ground mount: 15-45° tilt, aircraft-grade aluminum, DIY-friendly, scalable, compatible with all full-size panels.

The IntegraRack IR-45ASA Adjustable Seasonal-Angle BallastRack(TM) allows for effortless seasonal adjustment of your solar modules--tilting between 15° and 45°--to maintain optimal sun alignment ...

The IntegraRack IR-45ASA is a robust, adjustable BallastRack designed to optimize solar panel orientation throughout the year. This innovative rack system allows for seasonal angle adjustments, ...

The IR-45ASA is the most cost effective seasonally adjustable solar racking system on the market with its fast, easy installation and its ability to rack very large solar panels.

Designed to support large solar panels, it features a 15-45° adjustable angle for optimal year-round performance and fast snow shedding. With four mounting options, it handles diverse terrains without ...

The IR-45ASA offers the same ground-breaking features as IntegraRack's other BallastRack models with the ability to adjust the angle of each panel separately for seasonal adjustments.
