

Solar Photovoltaic Intelligent Combiner Box

What is a PV combiner box?

In every photovoltaic (PV) system, stable power generation relies on more than panels and inverters. Hidden behind the scenes is a critical piece of equipment: the PV combiner box. Though easy to overlook, this device plays a decisive role in current collection, circuit safety, surge protection, and intelligent monitoring.

What types of solar combiner boxes are available?

We offer a variety of solar combiner boxes, including DC and AC. DC combiner boxes cover 1-24 input channels, support 600V/1000V/1500V system voltage, and current range 10A-400A. AC combiner boxes support low-voltage and medium-voltage applications.

Do you need a solar combiner box?

Adaptability: While smaller residential systems may not require a combiner box if they have only one to three strings, larger systems--ranging from four strings up to thousands--benefit greatly from their use. This adaptability makes combiner boxes suitable for both residential and commercial applications. II. Basics of PV Solar Combiner Boxes

What is a 600v DC combiner box?

600V DC combiner box is LETOP's economical solution designed for small PV systems. It offers 1-6 string inputs and 1-2 string outputs. Supports 600V DC system voltage. It also uses high-quality components to ensure overcurrent and overvoltage protection. Suitable for 5kW-10kW small residential rooftop or small commercial PV systems.
