

Ranging from 25 to 50 meters in height, the Supertrees are a unique showcase of vertical gardens like never before. All 18 Supertree structures are clad with Tropical Environment's proprietary ...

The native tree species that were planted are the Indian Margaritaria (*Margaritaria indica*), Nemesu (*Rubroshorea pauciflora*), Buah Kulim (*Scorodocarpus borneensis*), Seashore Mangosteen (*Garcinia ...*

This is where the protagonist of this story comes in: Gardens by the Bay, in Singapore. At the center of this project is a set of 18 supertrees, structures measuring 25 to 50 meters tall that ...

Soak in the spectacular views of the Gardens against the Marina Bay skyline, with icons like Marina Bay Sands and the Singapore Flyer visible from atop this aerial walkway. 11 of the Supertrees are ...

Eighteen "supertrees" -- artificial trees up to 165 feet tall -- will be unveiled to the public later this month in a new garden in Singapore. The mechanical trees contain vertical gardens, generate solar power, ...

Eleven of these supertrees are outfitted with solar photovoltaic systems, converting sunlight into needed energy. The energy provides light and assists with the water technology needs. But the trees are not ...

Singapore's supertrees have redefined what's possible with urban solar power. They prove that vertical photovoltaics can enhance cityscapes while contributing meaningfully to clean energy goals.

In Singapore, 18 "supertrees" capable of harnessing solar energy are helping to power the city-state's Gardens by the Bay. These vertical gardens reach up to 50 meters in height and are covered in more ...

Here, botanical displays tell the story of Singapore's diverse cultural landscape and history, with plants that have shaped the island nation's development over centuries.

At the heart of this project stand 18 supertrees measuring between 25 and 50 meters tall, functioning as solar-powered vertical forests. Eleven of these structures contain photovoltaic systems ...
