

Survey on the current status of wind turbine development

Circularity: The reuse, repurposing, recyclability and recovery of wind farm components including wind turbines, and the reduction of waste and environmental impacts generated in the wind ...

The U.S. Wind Energy Monitor is an indispensable resource for industry players who refuse to be caught off-guard by rapid changes. With our expert analysis at your fingertips, you can confidently chart your ...

China is building on its 14th Five-Year Plan for the Development of Renewable Energy published in 2022, with the aim to double wind and solar energy generation, with more than 300 GW of wind ...

The Offshore Wind Market Report: 2024 Edition provides detailed information on the global offshore wind energy industry through Dec. 31, 2023, and tracks U.S. projects in various stages of ...

68 GW of onshore wind and 97 GW of offshore wind (OFW) auctions are in the pipeline.¹⁴ Table 1 shows a few commonly used competitive offtake mechanisms for wind energy.

Given the clear economic, social, and environmental advantages of wind power as a cornerstone of a renewable energy system, the main obstacles to progress today come not from ...

This work is adapted from two chapters in "Wind Energy for the Rest of Us" by the first author and summarizes the key characteristics of wind turbine development in tabular ...

What is the future of wind energy conversion systems technology? The paper reviews the recent developments in wind energy conversion systems technology and discusses future expectations.

Offshore wind therefore stands as a pivotal technology in this current era. Our report finds that there is now already 83 GW of offshore wind installed worldwide, keeping the lights on for 73 ...

Scientists, engineers, and analysts at the U.S. Department of Energy's (DOE's) National Renewable Energy Laboratory (NREL) are propelling our country closer to this clean energy future with new ...
