

"With the launch of B-VAULT FlexGrid, we are introducing a compact, modular, easy-to-install, and regulation-ready platform tailored for Europe's evolving energy landscape," said ...

As we approach Q2 2025's bid deadline, one thing's clear: Switzerland isn't just buying storage systems--they're procuring grid resilience. The winners won't be those with the cheapest kWh price, ...

Headquartered in Switzerland, we deliver scalable, site-ready solutions that integrate battery technology, power conversion and intelligent energy management into one reliable system.

The Switzerland energy storage system market is experiencing significant growth driven by factors such as increasing renewable energy integration, grid stability requirements, and government incentives ...

This article explores cutting-edge storage solutions reshaping grid stability while addressing renewable energy intermittency - a challenge affecting solar, wind, and hydroelectric systems alike.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it the country's ...

Based on current scientific knowledge, leading Swiss researchers consider that where large amounts of energy need to be stored for the medium to long-term, technologies such as ...

Swissgrid sees battery storage as a key technology for the energy transition. It not only facilitates the integration of renewable energies, but also increases the flexibility of the entire ...

In Switzerland, the first of these systems was installed by the company, which was founded in 2017 in Lugano in the canton of Ticino, at the global headquarters of the elevator ...

Switzerland's energy scene is like a precision watch - every component must work seamlessly. With 75% of its electricity already from renewables\*, the Swiss now face a &quot;good ...
