

Battery storage systems play an important role in this new energy system. Batteries can store electricity, especially when generation is high and demand is low. Conversely, they can supply ...

A new pumped-storage power station, one of the most powerful in Europe, came on stream in canton Valais in southern Switzerland in July 2022.

This article explores cutting-edge storage solutions reshaping grid stability while addressing renewable energy intermittency - a challenge affecting solar, wind, and hydroelectric systems alike.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it the country's ...

These installations embody what B-VAULT FlexGrid was designed to do: deliver compact, compliant, and intelligent energy storage where it's needed most, without compromise on ...

Swiss engineers are converting excess summer solar into hydrogen stored in repurposed natural gas caverns. Come winter, this becomes heating fuel - solving the seasonal mismatch that ...

Primeo Energie will use our storage system to provide energy flexibility. The battery stores surplus electricity from renewable sources and feeds it back into the grid as needed. In this way, fluctuations ...

"With the launch of B-VAULT FlexGrid, we are introducing a compact, modular, easy-to-install, and regulation-ready platform tailored for Europe's evolving energy landscape," said ...

At Schindler Group's global headquarters in Ebikon (Canton of Lucerne), Energy Vault has deployed a 2 MW/2-hour B-VAULT FlexGrid system, the company's first installation in Switzerland.

(CONNECT) With the launch of its high-tech energy storage device FlexGrid, Energy Vault has announced its official entry into the Swiss market. FlexGrid is a product for industrial, ...
