

The Asian Development Bank (ADB) and Gulf Renewable Energy Company Limited have entered into a USD 820 million loan agreement to finance a portfolio of 12 renewable energy projects in Thailand.

The increased solar and energy storage targets could sustain the forecasted electricity demand increase from data centres and EV charging in the coming years.

"This portfolio of projects significantly enhances solar energy and solar energy with battery storage in Thailand, marking a major step forward in the country's goal of achieving carbon neutrality.

"By integrating battery storage with solar power, these projects will help to provide clean energy during non-daylight hours, grid stability and facilitate further integration of solar power which ...

ADB and Gulf Renewable Energy Company Limited, a subsidiary of Gulf Energy Development Public Company Limited, have signed an \$820 million loan to provide construction ...

Export Finance Australia boosts renewable energy investment in Thailand Export Finance Australia (EFA) is providing a US\$50 million loan to support the development of new solar and ...

Expand access to essential services such as health care, education, and communication Driving a Clean Energy Future for Thailand The agreement underscores Thailand's growing ...

Thailand accelerates deployment of solar-plus-storage infrastructure, including floating solar arrays, to meet rising energy demand from AI and digital sectors.

GreenRock Energy Partners, a leading Thailand-based renewable energy firm, is set to significantly expand its solar PV and energy storage portfolio. The company plans to add an ...

ADB and GULF secure \$350 million financing to build solar and battery storage projects in Thailand, reducing 191,550 tons of CO2 annually and supporting the country's net-zero by 2050 goal.
