

# The export of solar modules ranks second in the world

Data source: U.S. Energy Information Administration, Form EIA-63B, Annual Photovoltaic Module Shipments Report Note: Monthly data for 2024 are based on a subset of the largest manufacturers ...

According to InfoLink's statistics for 2024, the top ten shipped around 502 GW of modules, up 22% YoY, showing that the annual growth rate has begun to narrow, as previously ...

JA Solar ranks second in the world with 57GW of shipments in the first three quarters of 2024, and there should be little doubt that it will continue to soar and take second place in global ...

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. In ...

The world's top 10 solar photovoltaic (PV) module manufacturers shipped a record 500 gigawatts (GW) of modules in 2024, nearly doubling the previous year's volume, according to Wood ...

Capacity exceeded demand and module spot prices fell below \$0.10/W from late May 2024 -- a sign of intense oversupply and margin pressure. The ranking below reflects that ...

Gandhinagar, 3 April 2023: Only four countries - China, Japan, Malaysia and Germany - supplied 70 per cent of the global exports in solar photo-voltaic cells/modules in 2021, according to an ...

Discover all statistics and data on Global solar PV supply chain now on statista !

China leads the world in Solar Module exports with 103,827 shipments, followed by Vietnam with 95,537 shipments, and India taking the third spot with 29,388 shipments . These facts are updated till Aug ...

China is the world's leading exporter of solar cells, exporting a large number of solar cells every year. According to the publisher's analysis, in 2021, China exported 3.201 billion solar cells, up 17.56% ...
