

The neighbor next door is doing solar power generation

As of 2021, there are more than 3,500 utility-scale solar projects in the United States. Millions of Americans - from California to Texas to New Hampshire - live near large solar projects. If a new ...

The more solar panels you see around your neighbourhood, the more likely you are to have them installed yourself. It's a form of social license - seeing solar near you legitimises the idea.

If solar energy systems installed on your property are adversely impacting your neighbors, several steps can be taken to address the issue efficiently and amicably.

Navigate solar panel disputes with HOAs and neighbors. FindLaw explains your legal rights, state laws, and solutions for resolving conflicts.

Solar power has transformed from a fringe technology to a common sight in neighborhoods across America. The solar panels gleaming on your neighbor's roof aren't just status symbols - they ...

The scientists sent out surveys to people living within three miles of large-scale solar projects installed between 2017 and 2021, asking about their support levels for new solar projects, as ...

Would you like living next door to a solar farm? Traditionally, it's been thought that although people like the idea of renewable energy plants, they don't want them close by.

Solar panels require direct access to sunlight to generate energy -- but what can you do to prevent the possibility that your neighbor will add a second story or plant a large tree?

Can I Object to My Neighbor's Solar Panels? Before you object to a neighbor's solar panels, understand the balance between individual property rights and broader renewable energy ...

Does anyone have any experience living next to a solar farm? Our next door neighbors are currently in the process of leasing their farm to a solar company that plans to cover the 70+ acres with solar panels.
