

UK Mobile Energy Storage Container Fast Charging

Fellten, the UK-based electric vehicle (EV) technology and systems manufacturer, has announced a strategic partnership with the retrofit emissions company Cybrand to deploy the mobile ...

The Charge Qube is a rapidly deployed, UK-made, modular Mobile Battery Energy Storage System (BESS) and Mobile Electric Vehicle Supply Equipment (EVSE) that removes the ...

With a large capacity of 2 MWh, this vehicle offers ample storage to meet the demands of various industries. Equipped with six new energy vehicle charging guns, it allows for fast charging ...

Larger 20ft containers can store up to 900kWh, supporting overnight AC charging for multiple vehicles (up to 12 at 7kW per port) and a rapid 22kW daytime top-up option. For fast ...

By leveraging second-life EV battery packs and modular containerised design, we are delivering a cost-effective, scalable product that supports businesses and public infrastructure with ...

The new Charge Qube provides sustainable energy thanks to its integrated solar and wind energy capabilities. The Charge Qube, which is made in the UK, is delivered in a 10-foot ISO ...

EV specialist Fellten has launched a new all-in-one charging system designed to speed up the UK's electric transition by removing the need for planning permission. The innovative Fellten ...

Our containerised energy storage solutions are available as 10ft and 20ft high cubes and stand almost 3m tall, they can be deployed all over the UK and further afield (we have a footprint in ...

Designed for speed and efficiency, the Charge Qube can be rapidly deployed without the need for complex planning or infrastructure upgrades. Housed within a durable 10-foot sea container, it ...

Its Type-2 AC version features up to five satellite stalls with twin chargers, while a CCS DC fast charging variant provides dual 240kW output. The design allows the unit to be operational ...
