

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. Battery storage is essential for providing the ...

This article shows the regional divide of energy storage in the UK, delving into both operational capacity and the pipeline. Our data shows that three different regions lead for operational ...

British battery energy storage system (BESS) firm Field has secured new financing to continue building out its UK project pipeline. The £42 million non-recourse loan from Rabobank and ING will finance ...

From the caverns of Teesside and the reservoirs of Scotland to futuristic cryogenic tanks near Manchester, the UK is assembling a flexible, secure and low-carbon energy storage landscape.

Battery storage is becoming a cornerstone of the UK's clean energy future, just as solar has moved from marginal to mainstream. Together, they are reshaping the way energy systems are ...

RWE has begun constructing its first seven UK solar and storage sites, representing 330MW of solar and 45MW of co-located battery energy storage systems (BESS).

Discover how solar battery storage in the UK creates income opportunities for landowners. Uncover lease models, risks, and strategy here.

This is the third UK project Trina Storage has finalised in partnership with Field and follows from a 20 MWh battery storage site that opened this July in Gerrards Cross, on the outskirts ...

Notes to editors Long-Duration Electricity Storage (LDES) refers to energy storage systems that can store and release electricity for long periods, defined as eight hours or more. These ...

At Field, we're accelerating the build out of renewable energy infrastructure to reach net zero. We are starting with battery storage, storing up energy for when it's needed most to create a more reliable, ...
