

Solar power growth is expected to help some parts of the country meet electric demand last summer. (Photo by Robert Zullo/ States Newsroom) A bill that would set up a framework for ...

VA is one of the most active states in the country in regards to solar development, SEIA is also currently heavily involved in collaborative efforts to reform utility scale solar siting policies as well.

Here are both the completed and under-construction solar projects in Virginia, as we continue to develop multiple utility-scale solar projects.

The new law directs Dominion Energy to launch a 450-MW virtual power plant pilot, allowing homes and businesses to aggregate solar panels, batteries, EV chargers and smart devices ...

The proposal includes more than 1,400 megawatts of solar and energy storage projects, enough to power approximately 350,000 homes. Most projects are planned for construction between ...

This is a list of electricity-generating power stations in the U.S. state of Virginia. In 2022, Virginia had a total summer capacity of 29,169 MW through all of its power plants, and a net generation of 89,477 ...

Distributed Power Plants (DPPs), also known as virtual power plants, are now allowed in Virginia! Learn what DPPs are and how they will benefit Virginia's energy grid and solar owners.

In 2023, Virginia ranked as the 9th largest producer of solar energy in the United States. Today about 5% of Virginia's total power is generated from solar plants (EIA, 2024), with more on the way as ...

Explore solar, wind, battery storage, and other energy projects. Track interconnection queue requests across US ISOs and utilities, with daily data updates. Learn what types of projects are being ...

Here is a map of all utility-scale solar farms in Virginia. Hover over a solar farm to view information on each project like their name, capacity and construction date.
