ajax jquery simple get request Asked 13 years, 11 months ago Modified 6 years, 5 months ago Viewed 264k times

In-stock and custom battery enclosures that handle all weather environments, maintain productivity and offer specific designs to help ensure cooling of critical components and allow for the safe release of ...

So, I've come up with a simpler script that returns all the GET parameters in a single object. You should call it just once, assign the result to a variable and then, at any point in the future, get any value you ...

When I try to install a python module or execute a script I get the following error: [SSL: CERTIFICATE\_VERIFY\_FAILED] certificate verify failed: unable to get local issuer certificate ...

Ultimately it probably doesn't have a safe .get method because a dict is an associative collection (values are associated with names) where it is inefficient to check if a key is present (and return its value) ...

What is confusing you? You evidently know what .get invoked on a dictionary does, that's what's being called for each key in the dictionary.

## Where to get the sample of solar container battery cabinet
