

Now, you can take control of your wind turbine like never before with the TESUP Mobile App! Whether you're at home or on the go, our app allows you to monitor and manage your wind ...

Calibrate your phone, measure the wind, then share your results--complete with live wind speed, direction, and map location--with your community. Your friends see exactly where you are, how ...

The Breeze app for iOS and Android enables monitoring of key metrics on the go. Access live production data from your entire portfolio and drill down to see the status of each wind turbine.

The Norvento app allows you to monitor your nED100 wind turbines" performance and to access real-time and historical data of its main variables from any mobile device.

The Norvento app allows you to monitor your nED100 wind ...

The Wind app collects data from your wind turbines and presents it in an intuitive interface. Access key figures from your entire portfolio of wind farms and drill down to monitor the status of each wind ...

Compare the best Wind Farm software of 2026 for your business. Find the highest rated Wind Farm software pricing, reviews, free demos, trials, and more.

Discover WindDeep: advanced wind farm management software with real-time monitoring, SCADA integration, production forecasting and performance optimization.

Wind farm software is designed to monitor, analyze, and optimize the performance of wind energy assets. It collects real-time data from turbines, weather sensors, and power grids to provide insights ...

From monitoring turbine performance and structural health to managing various wind energy applications, our systems deliver precision and reliability for manufacturers and wind farm operators ...

Precision Tools for Wind Resource Assessment, Forecasting, and Turbine Optimization to Power Smarter Energy Decisions.
